

## PVD860D - Transducer Calibrator / Tester

\*Required for field installation of PUREGAS Solid State Transducers.

- 128x64 LCD display, 4x4 keyboard
- Test transducers before and after installation
- Recalibrate transducers
- Transducer setup and test
- Measure cable resistance, voltage and capacitance
- Measure transducer operational current, quiescent current, max. reading current and min. reading current
- Discover/record addresses of transducers on line (multi-mode search)
- Password protection
- Extensive diagnostic facilities
- Real time clock to display year, month and day
- Auto power-down

## Pressure Transducer Manifolds

### PVTMH5P - Five Bank Manifold

- Accommodates up to 5 Manifold Install type Pressure Transducers
- Includes 6 pair wire harness

### PVTMH10P - Ten Bank Manifold

- Accommodates up to 10 Manifold Install type Pressure Transducers
- Includes 25 pair wire harness
