

Monitoring System PVD800V

The PVD800V is designed to monitor dedicated, subscriber, and addressable transducers, air dryers, panels, trunk and toll cable pair loop resistance and binary alarms associated with the pressurized cable network.

- Monitors up to 400 transducers and 15 dryers and panels
- Direct replacement for existing monitoring systems
- Supports Ethernet, PSTN and Serial communications
- Remote firmware upgrade capability
- Hot slot plug-in modules
- Watchdog circuit provides reliable continuous operation
- Includes support software: PGComm, PGEEditor, and PGHist
- NEBS Level 3 compliant

Ordering Information

Part Number	Description
PVD800V	Chassis
PVD800VC	Control module
PVD800VP	Power module
PVD800VA	Addressable module
PVD800VD	Dedicated module
PVD800VM	Universal module (36 DED / 25 BIN / 25 SUB)
PVD800VB	Blank slot cover
